

Varun — 2027 Trading Calendar Report

Basis: Birth chart uploaded: 6 Sep 1977, 13:31 IST, Bulandshahr, India.

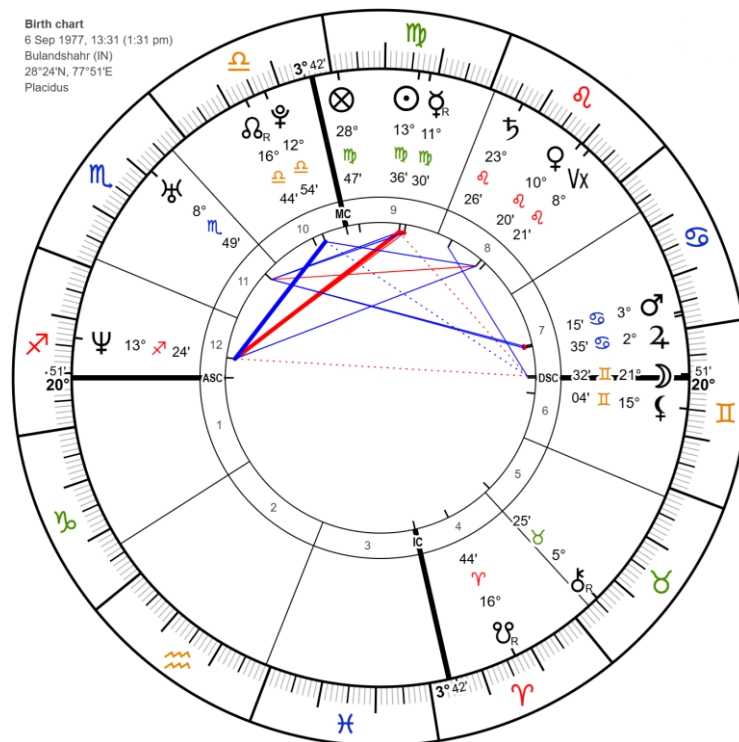

Analysed & Created By: Pandit Bodh Raj Bist (Okhimath - 246469)

Trading time reference: 09:15 IST for Indian market opening.

Output: 134 favourable trading dates, filtered for weekdays and provisional exchange holidays. NSE keeps an official holiday-calendar page by segment/year; for 2027 holiday filtering here I used the currently available BSE 2027 holiday list as a provisional reference, so final dates should be rechecked when NSE/BSE publish the official 2027 circular.

This is **not a guarantee of profit**. Read it as an **astro-timing watchlist**: dates when Varun's chart is more active for decision-making, volatility capture, intraday movement, swing entries, commodities, or forex. Final trade should come only from price confirmation, risk management and liquid instruments.

2. 2027 Yearly View

2027 is a better year for Varun after January. The strongest trading rhythm comes in **February, June, August, September and early October.** These months activate his Virgo Mercury-Sun, Cancer Jupiter-Mars, Leo Venus-Saturn and Libra MC-Pluto-Node zones.

The chart shows Varun is not best suited for random trading every day. His chart works better when there is a clear trigger: opening range break, strong rejection, clean trend day, or a swing setup after consolidation. His natal Moon in Gemini and Jupiter-Mars in Cancer can make him fast, but also emotional. Therefore, his best money days are not only “lucky days”; they are days where he must act with rules.

- **Phase 1: 25 Jan – 5 Feb** Very good for Indian market and swing trades. Moon and benefic transits activate Virgo, Libra and Leo natal zones.
- **Phase 2: 9 Feb – 16 Feb** One of the best early-year windows. **16 Feb** is very strong because Moon activates natal Moon/DSC zone.
- **Phase 3: 21 Jun – 25 Jun** Excellent technical trading period. Sun/Mercury/Jupiter activate Varun's Cancer Jupiter-Mars trading zone.
- **Phase 4: 2 Aug – 13 Aug** Very strong month for swing plus intraday. Leo and Libra activation support confidence, capital flow and market visibility.
- **Phase 5: 13 Sep – 1 Oct** This is the **strongest 2027 money-making belt** in the whole calendar. Jupiter activates Virgo Sun/Mercury area; Libra points also become active. This is best for serious trading, system deployment and swing entries.
- **Phase 6: 17 Nov** Single powerful day. Moon activates natal Jupiter-Mars Cancer zone. Good for intraday/commodity/forex, but risk is also high.

7. Practical Trading Plan for Varun

For Intraday in Indian Stock Market

Best days: **I, I/S, I/S/C/FX** marked dates.

Use this simple rule:

Opening 09:15–10:30: Do not jump blindly. Let the first move reveal direction. Varun's Gemini Moon can make him enter too fast. Best entry is after opening range acceptance or rejection.

Middle 10:30–13:30: This is better for him. Virgo Mercury-Sun gives better judgement after first noise is over.

Closing 13:30–15:30: Use this for-profit booking or swing conversion. Avoid converting a bad intraday trade into swing.

For Swing Trading

Best dates: **S and I/S** dates, especially during January-February, June, August and September.

Swing rules for him:

1. Enter only near support/resistance confirmation.
2. Do not buy after a vertical candle.
3. Keep position size smaller when Moon is activating Cancer Mars/Jupiter because emotion can rise.
4. Book partial profit quickly on Venus-Saturn activation days.

For Commodity

Best dates: **C, C/FX, I/S/C/FX**.

Commodity trading suits him when Taurus, Cancer, Leo, Scorpio, Sagittarius and Libra zones are active. Gold and silver may suit better than random commodity trades because Taurus Chiron and Leo Venus-Saturn are strong. Crude and natural gas can give movement but need strict stop-loss.

For Forex

Best dates: **FX and C/FX**.

Forex can suit him because Sagittarius Ascendant and Neptune are active, but this is also the danger zone. He must avoid prediction-based trades. Only trade if price structure confirms.

8. Final Call

Varun's 2027 chart is not uniformly active all year. The real trading year starts strongly in **late January and February**, slows in **April-May**, becomes active again in **June**, gives a powerful setup in **August**, reaches the strongest peak in **September**, and then becomes selective after October.

The best way to use this report is simple: **Trade more on A+ and A days. Trade normal or smaller on B+ days. Trade very selectively on B days. Avoid forcing trades in April, May and December.**

For Varun, the best 2027 markets are:

1. Nifty / Indian index trading
2. Liquid stock swing trades
3. Gold/Silver/Crude only on marked commodity days
4. Forex only on FX-marked days with strict stop-loss

The cleanest money-making window of 2027 is **15 September to 1 October 2027**

This is the period where his natal Mercury-Sun, Libra MC-Pluto-Node, and trading decision zones become highly active. This should be treated as the main professional trading window of the year.
